

Mohamed Ferchichi

216 55 018 704 | github.com/moohameedd | linkedin.com/in/mohamed-ferchichi

PROFILE

Passionate about software development and new technologies, I enjoy exploring new tools and constantly pushing myself further. Curious and self-driven, I'm particularly interested in Linux systems, PC hardware, and anything related to tech innovation.

EDUCATION

ISAMM – Higher Institute of Multimedia Arts of Manouba
2nd Year – Data Analysis & Big Data (Good Standing – 15.29/20)

ISAMM – Higher Institute of Multimedia Arts of Manouba
1st Year Bachelor's (Good Standing – 15.28/20)

Lycée Farabi – Mournaguia
High School Diploma, Computer Science (High Honors – 17.3/20)

PROJECTS

Digit Recognition | *Python, Neural Networks, HTML, CSS, JavaScript*

- Designed and trained a neural network for handwritten digit recognition
- Integrated the model into an interactive web interface (HTML, CSS, JavaScript) allowing users to draw and predict a digit in real time

Student Performance Analysis | *Python, pandas, scikit-learn, Machine Learning*

- Exploratory Data Analysis (EDA) and ML modeling on the habits of 80K students versus their academic performance (motivation, stress, sleep, study habits)
- Predictive modeling with Decision Tree, Random Forest, Gradient Boosting, Logistic Regression, and KNN
- Segmented students into behavioral profiles via K-Means clustering, and extracted association rules

Neural Network From Scratch | *Python, NumPy, Mathematics*

- Implemented a neural network entirely from scratch in Python, with no deep learning framework, relying only on NumPy and the underlying mathematics (forward/backward propagation, gradient descent)

Portfolio – VS Code Theme | *HTML, CSS, JavaScript, React*

- Personal portfolio website designed to replicate the Visual Studio Code interface (theme, file explorer, tabs)
- Built with HTML, CSS, JavaScript, and React to present my projects in an interactive and original way

OTHER PROJECTS

Bablio App | *Java, Android Studio*

- Android library management application

Bondin Coffee | *HTML, CSS, JavaScript, PHP, MySQL*

- Website for a coffee shop – menu and order management

TECHNICAL SKILLS

Web: HTML, CSS, JavaScript, PHP, React

Databases: MySQL, Firebase, MongoDB

Machine Learning: pandas, NumPy, Matplotlib, PyTorch, scikit-learn

Languages: Python, Java, C, R (Statistics)

Tools: Linux – Ubuntu, Android Studio, Git

Typing Speed: 81 words per minute

Languages Spoken: French, English, Arabic

LICENSES & CERTIFICATIONS

Introduction to Deep Learning with PyTorch – DataCamp

Unsupervised Learning in Python – DataCamp

Supervised Learning with scikit-learn – DataCamp

Linux Unhatched – Cisco

Scientific Computing with Python – freeCodeCamp

ACTIVITIES

Problem Solving Club – ISAMM

- Active club member
- Participated in the Bee Battle Manouba contest (beginner category)
- Produced a tutorial video for the club's channel: "Getting Started with Python"
